

Are you still using a mop and bucket?

Nilfisk has a better solution

The Problem

- You have a small, hard surface area in a high-traffic location
- This space is highly visible and it is critical to keep it clean, sanitary, presentable and safe

Typical Solution: Mop & Bucket

- One of the most common solutions for a space like this is a mop and bucket. But this approach isn't ideal.
- **Unsanitary:** Each dip of the mop contaminates 18-20% of the clean water (after 5 dips, the entire bucket has been contaminated)
- **Ineffective:** The mop is merely spreading dirt, grime and chemicals around the area, leaving a dirty, hazy and sticky residue
- **Dangerous:** After mopping, the area remains wet, increasing the risk of slip-and-falls

ADVANCE SC100™
Cord Electric Upright Scrubber

ADVANCE SC351™
Battery Operated Micro Scrubber

Nilfisk's Recommended Solution: Automatic micro scrubbers

- **Efficiency:** Clean 4,873 square feet per hour with a 14" scrubber, while a 24-oz mop will cover only 2,564 in the same amount of time
- **Portability:** Battery power can make these machines just as portable as a mop and bucket
- **Storage:** Compact footprint allows for easy storage
- **Visitor safety:** Floors are left clean and dry in one pass
- **Operator safety:** Recovery tanks and accessories limit contact with germs and waste
- **Containment:** Fewer contaminants are released into the air, protecting both visitors and operators
- **Sanitary:** Use anti-bacterial detergents for maximum impact

Are you still using a mop and bucket?

Nilfisk has a better solution

ADVANCE SC100™

Upright Scrubber

- 12.2 inch scrub path
- Cylindrical scrub brush operates at 2,100 rpm
- Forward and reverse solution recovery
- Solution tank dispenses only clean solution
- 0.8 gallon solution tank/ 1 gallon recovery tank

CLARKE VANTAGE 14

Battery Micro Scrubber

- 14.5 inch scrub path
- 3 gallon solution/ recovery tanks
- Patented, rotating deck
- Single 14 inch disc scrub brush
- Full battery-powered operation and onboard battery charger

ADVANCE SC351™

Battery Operated Micro Scrubber

- 14.5 inch scrubbing width
- 2.5 gallon solution tank/ 3 gallon recovery tank
- Patented rotating deck with integrated squeegee allows for forward and backward scrubbing
- Simple and intuitive controls
- Compact design and foldable handle for easy storage

CLARKE MA10™ 12E

Cord-Electric Upright Scrubber

- 12.2 inch scrub path
- 4 inch cleaning clearance
- 0.8 gallon solution tank/ 1 gallon recovery tank
- Ideal design for scrubbing small spaces quickly
- Creates a cleaner environment compared to mopping

CLARKE MA30™ 13B

Battery Micro Scrubber

- 13.5 inch scrub path
- 1.6 gallon solution tank and recovery tank
- Front squeegee can be raised to pick up small debris while scrubbing
- Adjustable brush pressure knob to optimize required cleaning intensity
- Easy to maintain with tools-free brush and squeegee removal

VIPER FANG™ 15B

Micro Scrubber

- 15 inch cleaning path
- 3.5 gallon solution/ recovery tanks
- Fold-down handle for easy storage
- Cast aluminum squeegee assembly
- Pad/Brush assist drive

CLARKE MA50™ 15B

Battery Micro Scrubber

- 15 inch scrub path
- 3.5 gallon solution/ recovery tanks
- Easy-to-use fingertip controls
- Low profile design for cleaning tight, hard-to-reach areas
- Onboard battery charger and auxiliary charging cable

ADVANCE SC250™

Battery Micro Scrubber

- 13.5 inch scrub path
- 1.6 gallon solution tank and recovery tank
- Front squeegee can be raised to pick up small debris while scrubbing
- Adjustable brush pressure knob to optimize required cleaning intensity
- Available with 1-hour fast charger
